PROFILE

I am committed to contributing my best to every company I join by utilizing my technical skills, creativity, and dedication. I focus on building dynamic applications, optimizing system efficiency, and constantly learning new technologies to deliver effective and impactful solutions that make a meaningful difference in the workplace.

SKILLS & EXPERIENCES

Programming Languages

- Php, C,C#, Java, JavaScript, Python

Frameworks/Web Technologies

- HTML/CSS, Spring,Bootstrap

Database Systems

- MySQL, SQL Server, Oracle, MongoDB

Soft Skills

- Team Work,Time Managemet,Leadership, Effective Communication

DULITHA SAMATH PUNSARA

SOFTWARE ENGINEERING UNDERGRADUATE

EDUCATION

- Higher National Diploma In Software Engineering
 - NIBM University SriLanka2024 - Present
- Diploma In Software Engineering
 - NIBM University SriLanka2023 - 2024
- Rahula College Matara
 - G.C.E Advanced Level Examination
 - G.C.E Ordinary Level Examination2019
2016

PROJECTS

- Gym Management System [GitHub](#)
 - Developed a web application using **PHP, HTML, JavaScript, MySQL, Bootstrap** to manage gym memberships,staff,schedules, and tracking.
- Pharmacy Management System [CitHub](#)
 - Developed a comprehensive Pharmacy Web Application using **Java and SpringBoot** to manage various aspects of a pharmacy, Used MySQL for database management and authentication operations.
- Highway Management System [CitHub](#)
 - Developed using algorithms, tracking data such as vehicle entry, traffic on the highway,accidents, fuel consumption, and driver numbers. **JavaScript** (data visualization),**Algorithms** (data tracking and processing)
- Student Management System [CitHub](#)
 - Application that enables efficient management of student data using **C#** (Windows Forms Application)
- Blood Donation System [CitHub](#)
 - An enterprise-level application using **Java** to manage blood donation logistics, including donor registration, event management, and inventory tracking.
- Automated Orange Juice Making Machine [Linkedin](#)
 - Designed to simplify and streamline the juice extraction process, providing fresh, high- quality orange juice on demand.(using **Arduino**)
- E-Shopping Cart [Linkedin](#)
 - Smart, obstacle-sensitive cart designed to follow a pre-determined line, stopping automatically whenever it encounters an obstacle in its path. (Using **Logic Gates**)
